SIN©GRACE The Chemical Company

METAL SURFACE TEATMENT

Metal rust inhibitor MC-P5200

	• The passivating film is colorless
	• No chromium and heavy metal ions
FEATURE	• Pollution-free and it is environmentally friendly product
	• Can increase the coating adhesion and anti-corrosion
	performance
	 Recommended dosage: 0.3~0.5%
	• Temperature: Room temperature or medium temperature
	 Processing time: 1-2 min
APPLICATION	 Processing way: Dipping or spray
ALL HIXATIXI)	 pH: 8.0-10.0
PROCESS	*
INCLUS	The using dosage is depends on the storage time, material and
	other environmental indexes. Our technical engineer will
	recommend the optimal using dosage according to the customers'
	request.

TECHNICAL	wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧
	wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment
TECHNICAL PROCESS	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted
	wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment
PROCESS	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted
	wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting
PROCESS APPLICATION	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting Cast iron parts, cold-rolled sheet and galvanized steel profiles
PROCESS	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting Cast iron parts, cold-rolled sheet and galvanized steel profiles
PROCESS APPLICATION	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting Cast iron parts, cold-rolled sheet and galvanized steel profiles
PROCESS APPLICATION	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting Cast iron parts, cold-rolled sheet and galvanized steel profiles surface treatment etc.
PROCESS APPLICATION STORAGE	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting Cast iron parts, cold-rolled sheet and galvanized steel profiles surface treatment etc. Available in 200 kg/ barrel or 25 kg/ barrel
PROCESS APPLICATION STORAGE	 wash⑤Phosphate⑥Water wash⑦Rust inhibitor⑧ Post treatment Remark: Degreasing and rust removing process can be substituted for sand blasting Cast iron parts, cold-rolled sheet and galvanized steel profiles surface treatment etc. Available in 200 kg/ barrel or 25 kg/ barrel Storage period: 12-24 months in closed containers, shady and
