

Defoamer

DF-024 Silicone defoaming agent

DESCRIPTION DF-024 is silicone-containing defoamer. It is comparable with BYK 024. It has excellent defoaming performance and good compatibility with pigment and other emulsion.

TYPE Polysiloxanes and hydrophobic solids in polyglycol

- KEY FEATURES**
- Comparable with BYK 024
 - VOC-free silicone-containing defoamer
 - No effect on the coating gloss and color
 - Good compatibility with pigment and other emulsion

TYPICAL PROPERTIES	Appearance	Milky white liquid
	Nonvolatile matter content (%)	96
	Density (g/cm³)	1.0

APPLICATION

- Printing inks and overprint varnishes
- Automotive coatings
- Emulsion adhesives
- Industrial coatings etc.

Recommended Levels: 0.1-1.0% additive (as supplied) based upon total formulation. The additive can be added at any time during production. The amount of defoamer used is often divided (by adding 2/3 into the millbase and 1/3 into the let-down or finished product).

- STORAGE AND HANDLING**
- Available in 25 kg/barrel or 200kg/barrel
 - Store products in tightly closed original containers at 5-40°C
 - Shelf life: 12 months from delivery date
 - According to non-dangerous goods transport
